

Gooley Pop Niche - White paper

Gooley Pop Niche introduces a vibrant play-to-earn gaming ecosystem built on the Ethereum and Solana blockchains, featuring a collection of 3333 unique Gooley Pop NFTs and a mobile game rewarding players with \$GPN tokens. This whitepaper outlines the project's structure, including the Ethereum-based NFTs and game, alongside a \$GPN token functioning on the Solana blockchain for efficient fundraising and future utility.

The Gooley Pop Niche

Gooley Pop Niche inhabits a quirky and colorful world, with each Gooley Pop NFT a unique citizen. These 3333 programmatically generated NFTs boast various traits and rarities, offering a spectrum of customization and in-game functionality.

Play-to-Earn

Built on Ethereum: The play-to-earn game will reside on the Ethereum blockchain, leveraging its established NFT ecosystem. Players can utilize their Gooley Pop NFTs to enter the game, earning \$GPN tokens through:

- Competing in weekly tournaments and challenges
- Completing quests and objectives
- Social interaction and community engagement

\$GPN tokens serve as the in-game currency, used for:

- Purchasing in-game items and power-ups
- Upgrading Gooley Pop NFTs
- Participating in governance votes shaping the game's future

The Power of \$GPN: Solana Fundraising Token

Built on Solana: To fuel the project's development and ensure a smooth launch, a separate \$GPN token will be created on the Solana blockchain. \$GPN offers several advantages:

- **Scalability and Speed:** Solana's architecture facilitates faster transactions and lower fees compared to Ethereum, enabling a smoother user experience for fundraising.
- **Community Building:** The \$GPN token sale serves as an initial community-building mechanism, attracting early adopters and investors who believe in the Gooley Pop Niche vision.
- **Future Utility:** While \$GPN reigns supreme within the game, \$GPN may hold future utility within the Gooley Pop ecosystem, potentially granting exclusive benefits or governance rights.

Tokenomics

- **\$GPN Tokenomics:**

Total Supply: 100 million \$GPN tokens will be created and allocated for:

- **Play-to-Earn Rewards:** A significant portion dedicated to rewarding players.

- Development & Operations: Funding for ongoing development and team maintenance.
- Marketing & Community Building: Resources to promote the project and foster a vibrant community.
- Team & Advisors: A fair allocation for the team and advisors who bring the project to life.
- Distribution Mechanism:
 - Provide liquidity to a decentralized exchange (DEX) by adding tokens to a pool and earn fees on trades.
 - A portion of tokens will be reserved for the development team, advisors, and marketing efforts.
 - The project will hold an Initial Coin Offering (ICO) and Initial Exchange Offering (IEO) where users can buy tokens against \$SOL in community pre-sale.
- **Solana \$GPN Tokenomics Specifics:**
 - Total Supply: 100 million \$GPN tokens will be created for the fundraising round.
 - Sale Structure: First 100 wallets that reply to @goeypopniche “drop your wallet” tweet, on X.com, will receive \$GPN tokens from initial airdrop. After airdrops, a public pre-sale will be held. Following pre-sale, tokens will be listed on DEX where \$GPN can be exchanged for \$SOL.
 - Potential Future Utility: \$GPN is expected to be the future reward token for top three players who rank on the gaming leaderboard.

Roadmap to Goey Grandeur

A comprehensive roadmap will be presented, outlining key milestones such as:

- **Phase 1:** Creating 100 million \$GPN tokens on the Solana blockchain for project funding.
- **Phase 2:** NFT concept development, smart contract creation, audits and NFT minting.
- **Phase 3:** Mobile game development, beta testing, and community building initiatives.
- **Phase 4:** Mobile game development, game launch, and beta testing. Initial play-to-earn opportunities, and community building initiatives. Continuous game updates, introduction of \$GPN token utility, and potential expansion of the Goey Pop universe.
